Seal of: Bavarian Ministry of Economy and media, energy and technology

Explaining comments & the advanced results summary: The Bavarian Ministry is a part (province) of German ministries and the "Bayern Innovativ GmbH" is an authorized executive agency for the Free State of Bavaria and the German government to grant research funds for special projects honoring them. Thus supports Bayern / Germany the activities and product efficacy evidence by research sponsoring officially! This named tube devices called SHLS or MHR neutralize negative influences of man-made technical broadband alternating fields (as for instance given by wireless telecommunication applications; the relevance of this radiations please check in the WEB for instance [www.icems.eu](http://www.icems.eu)). Additionally documented and published significant research results of "Dartsch Scientific" had recently underlined by reproducible / repeatable cell biological tests in July 2016 one more times as in Febr. 2016 (hint: page 3), that SHLS & MHR's gave health supporting influences for humans. The influential can reveal health or to cure supportive effects by used / installed SHLS or MHR!

# ZERTIFIKAT · CERTIFICATE

**DARTSCH SCIENTIFIC GMBH**  
**Institute of Cell Biological Test Systems**  
herewith certifies that the products named  
**Multiple chamber cavity resonators**  
**(MHR and SHLS)**  
manufactured and distributed by  
**Florian M. König Enterprises GmbH, 82110 Germering, Germany**

have been tested for their potential to neutralise unwanted cellular effects of electromagnetic alternating fields as emitted by DECT phones.

### Test results

By using cultured connective tissue fibroblasts in several individual experiments with a variety of setups, we could demonstrate that the above mentioned multiple chamber cavity resonators are able to neutralise the cellular effects of emitted electromagnetic alternating fields up to 98 %. Thus, the devices can be recommended for individuals in order to reduce unwanted health effects of electromagnetic alternating fields emitted by devices such as DECT phones.
